

THE DECK REVEALED

Twenty-seven golden torus figures, derived from the raw material — the ternary codes under the bijection's own weights (field 9 · relation 3 · core 1). The signed sum is balanced ternary: every integer from -13 to +13 exactly once, so the map is collision-free *by theorem, not by choice* — the deck is the signed number line, the Seed at zero, the counter-card its negation. *No letter appears on this page. The key is in Lonnie's hand; these shapes are committed first.*

○ the circle — the unknot ∪ open coil — winding not yet locked (unknot class) ⊗ knot T(p,q) — locked, chiral; genus = (p-1)(|q|-1)/2

⌊ link — g rings, bound (gcd(p,|q|) = g) hand: flow = gold, right · turning = silver, left · the Seed = white-gold

petals = |q| — each card's signed number, visible as its symmetry

Emergent census under the tempered rule: 1 circle (The Seed) · 2 open coils · 18 locked knots, of which four are the trefoil (The Resonance, The Saturation, The Dreamer, The Knot — the first knot arrives fourfold, all in AUM, where structure first persists; The Knot's essence line is now literally true) · 6 link-cards in three bound pairs (The Surgeon, The Labyrinth, The Void, The Mask, The Spectrum, The Witness): the two Silences of concealment as three bound circuits, the Surgeon and the Witness as the healing operation bound whole, and the Void and the Spectrum as seven rings held by the shared hole. Deepest pair: The Scar and The

Return, $T(14, \pm 13)$, genus 78. The law: q is balanced ternary under the bijection's own weights $(9 \cdot 3 \cdot 1)$ — every integer from -13 to $+13$ exactly once; collision-free by theorem. The voice: p follows the tempered rule — stillness tempers the winding; the restless eight awaken the full weight. q is the law, p is the voice; the card is the concordant pair of its story and its shape.
